Subject Index

Acid site density
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. III. Influence of hydrocarbon impurities 307

Acid sites
Isomerization of n-hexane on platinum dealuminated mordenite catalysts: I. Influence of the silicon-to-aluminium ratio of the zeolite 283

Acid sites
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. II. Kinetic study 295

Acid-base properties
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45

Adsorption
Sorption of ethene and propene on amorphous nickel oxide–alumina/silica catalysts under oligomerization conditions 123

Adsorption
Temperature-programmed reduction and desorption studies of praseodymium promoted platinum/alumina catalysts 167

Adsorption
Influence of the activation temperature on the activity of copper–zinc oxide catalysts in the hydrogenation of propene 333

Ageing
Synthesis and characterization of iron-modified ZSM-5 55

Alkenes
Production of light alkenes from methanol on ZSM-5 catalysts 153

Alkenes (light)
Catalytic conversion of methanol to light alkenes on SAPO molecular sieves 139

Ammonia synthesis
Kinetics of wet atmosphere reduction of fused iron catalyst for ammonia synthesis L1

Ammoxidation
Vanadium oxide monolayer catalysts: Preparation, characterization and catalytic activity – a review 1

Antimony
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233

Basicity
Surface properties of magnesium oxide obtained from magnesium hydroxide: Influence of preparation and calcination conditions of magnesium hydroxide 265

Butene dimerization
Dimerization of n-butenes on amorphous $NiO–Al_2O_3/SiO_2$ catalysts 69

Caesium
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45

Calcination
Calcination conditions on copper/alumina catalysts for carbon monoxide oxidation and nitric oxide reduction 275

Calcination
Surface properties of magnesium oxide obtained from magnesium hydroxide: Influence of preparation and calcination conditions of magnesium hydroxide 265

Carbon dioxide methanation
DRIFTS study of adsorbed formate species in the carbon dioxide and hydrogen reaction over rhodium catalysts 219

Carbon monoxide oxidation
Calcination conditions on copper/alumina catalysts for carbon monoxide oxidation and nitric oxide reduction 275

Carbonaceous species
Effect of carbonaceous species on the catalytic activity of copper–nickel in the hydrogenation of ethene 33

Carbonate formation
Oxidative coupling of methane over praseodymium oxide catalysts 103

Catalyst characterization (DRIFTS)
DRIFTS study of adsorbed formate species in the carbon dioxide and hydrogen reaction over rhodium catalysts 219

Catalyst characterization (DRS, HREM)
Promoting effect of fluorine on cobalt–molybdenum/titania hydrodesulfurization catalysts 351

Catalyst characterization (DTA, IR, SEM, XRD)
Synthesis and characterization of iron-modified ZSM-5 55

Catalyst characterization (EPMA)

Co-impregnation of rhodium chloride with hydrofluoric acid into dry and pre-wet alumina 205
Catalyst characterization (FT-IR)
Diffuse reflectance Fourier-transform IR studies on the role of catalyst support on selectivity in ethene oxidation 247
Catalyst characterization (IR, XRD, TPD)
Catalytic cracking of hexadecane over ZSM-5 modified with $SiCl_4$, BCl_3, NH_4F and $LaCl_3$ 185
Catalyst characterization (NMR, TG-DTA)
Synthesis of zeolite ZSM-48 in the presence of 1,8-diaminooctane and hexamethonium bromide: Analysis and ^{13}C-NMR spectroscopy 79
Catalyst characterization (TGA, XPS)
Oxidative coupling of methane over praseodymium oxide catalysts 103
Catalyst characterization (TPD, TPR)
Temperature-programmed reduction and desorption studies of praseodymium promoted platinum/alumina catalysts 167
Catalyst characterization (TPR)
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233
Catalyst characterization (various techniques)
Vanadium oxide monolayer catalysts: Preparation, characterization and catalytic activity — a review 1
Catalyst preparation (additives)
Zirconia as a support for catalysts: Influence of additives on the thermal stability of the porous texture of monoclinic zirconia 363
Catalyst preparation (co-impregnation)
Co-impregnation of rhodium chloride with hydrofluoric acid into dry and pre-wet alumina 205
Catalyst preparation (hydrothermal)
Synthesis and characterization of iron-modified ZSM-5 55
Catalyst preparation (precipitation)
Surface properties of magnesium oxide obtained from magnesium hydroxide: Influence of preparation and calcination conditions of magnesium hydroxide 265
Catalyst preparation (zeolites)
Synthesis of zeolite ZSM-48 in the presence of 1,8-diaminooctane and hexamethonium bromide: Analysis and ^{13}C-NMR spectroscopy 79
Cobalt–molybdenum/titania
Promoting effect of fluorine on cobalt–molybdenum/titania hydrodesulfurization catalysts 351
Coke formation
Dimerization of n-butenes on amorphous $NiO–Al_2O_3/SiO_2$ catalysts 69
Coke formation
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233
Coke formation
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. III. Influence of hydrocarbon impurities 307
Conductivity
Electrical conductivity and defect structure of lithium-doped magnesium oxide 89
Copper oxide
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45
Copper oxide/alumina
Calcination conditions on copper/alumina catalysts for carbon monoxide oxidation and nitric oxide reduction 275
Copper–nickel
Effect of carbonaceous species on the catalytic activity of copper–nickel in the hydrogenation of ethene 33
Copper–zinc oxide
Influence of the activation temperature on the activity of copper–zinc oxide catalysts in the hydrogenation of propene 333
Cracking catalysts
Role of metal contaminants in the production of carbon dioxi
de during the regeneration of cracking catalysts 233
Deactivation
Catalytic conversion of methanol to light alkenes on SAPO molecular sieves 139
Defects
Electrical conductivity and defect structure of lithium-doped magnesium oxide 89
Diaminooctane

Synthesis of zeolite ZSM-48 in the presence of 1,8-diaminooctane and hexamethonium bromide: Analysis and ^{13}C-NMR spectroscopy 79

Dispersion
Promoting effect of fluorine on cobalt–molybdenum/titania hydrodesulfurization catalysts 351

Ethene hydrogenation
Effect of carbonaceous species on the catalytic activity of copper–nickel in the hydrogenation of ethene 33

Ethene oligomerization
Sorption of ethene and propene on amorphous nickel oxide–alumina/silica catalysts under oligomerization conditions 123

Ethene oxidation
Diffuse reflectance Fourier-transform IR studies on the role of catalyst support on selectivity in ethene oxidation 247

Ethylene oxide
Diffuse reflectance Fourier-transform IR studies on the role of catalyst support on selectivity in ethene oxidation 247

Fluid catalytic cracking
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233

Fluorine
Promoting effect of fluorine on cobalt–molybdenum/titania hydrodesulfurization catalysts 351

Formate species
DRIFTS study of adsorbed formate species in the carbon dioxide and hydrogen reaction over rhodium catalysts 219

Fourier-transform IR
Diffuse reflectance Fourier-transform IR studies on the role of catalyst support on selectivity in ethene oxidation 247

Fused iron
Kinetics of wet atmosphere reduction of fused iron catalyst for ammonia synthesis L1

Hexadecane cracking
Catalytic cracking of hexadecane over ZSM-5 modified with $SiCl_4$, BCl_3, NH_4F and $LaCl_3$ 185

Hexamethonium bromide
Synthesis of zeolite ZSM-48 in the presence of 1,8-diaminooctane and hexamethonium bromide: Analysis and ^{13}C-NMR spectroscopy 79

n-Hexane isomerization
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. III. Influence of hydrocarbon impurities 307

Hydrocarbon impurities
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. III. Influence of hydrocarbon impurities 307

Hydrodesulphurization
Promoting effect of fluorine on cobalt–molybdenum/titania hydrodesulfurization catalysts 351

Hydrofluoric acid
Co-impregnation of rhodium chloride with hydrofluoric acid into dry and pre-wet alumina 205

Infrared spectroscopy
Evaluation of magnesium aluminate spinel as a sulfur dioxide transfer catalyst 319

Inhibiting effect
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. III. Influence of hydrocarbon impurities 307

Iron
Synthesis and characterization of iron-modified ZSM-5 55

Isomerization
Isomerization of n-hexane on platinum dealuminated mordenite catalysts: I. Influence of the silicon-to-aluminium ratio of the zeolite 283

Isomerization
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. II. Kinetic study 295

Isotope labeling
Effect of carbonaceous species on the catalytic activity of copper–nickel in the hydrogenation of ethene 33

Kinetics
Sorption of ethene and propene on amorphous nickel oxide–alumina/silica catalysts under oligomerization conditions 123

Kinetics
Role of metal contaminants in the production of carbon dioxi

233
Kinetics
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. II. Kinetic study 295
Kinetics
Kinetics of wet atmosphere reduction of fused iron catalyst for ammonia synthesis L1
Lanthanide additives
DRIFTS study of adsorbed formate species in the carbon dioxide and hydrogen reaction over rhodium catalysts 219
Lithium
Electrical conductivity and defect structure of lithium-doped magnesium oxide 89
Lithium
Oxidative coupling of methane over praseodymium oxide catalysts 103
Magnesium aluminate spinel
Evaluation of magnesium aluminate spinel as a sulfur dioxide transfer catalyst 319
Magnesium oxide
Electrical conductivity and defect structure of lithium-doped magnesium oxide 89
Magnesium oxide
Surface properties of magnesium oxide obtained from magnesium hydroxide: Influence of preparation and calcination conditions of magnesium hydroxide 265
Mardenite
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. II. Kinetic study 295
Methane conversion
Oxidative coupling of methane over praseodymium oxide catalysts 103
Methanol conversion
Catalytic conversion of methanol to light alkenes on SAPO molecular sieves 139
Methanol conversion
Production of light alkenes from methanol on ZSM-5 catalysts 153
Monolayers
Vanadium oxide monolayer catalysts: Preparation, characterization and catalytic activity – a review 1
Mordenite
Isomerization of n-hexane on platinum dealuminated mordenite catalysts: I. Influence of the silicon-to-aluminium ratio of the zeolite 283
Nickel
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233
Nickel oxide–alumina/silica
Dimerization of n-butenes on amorphous $NiO–Al_2O_3/SiO_2$ catalysts 69
Nickel oxide–alumina/silica
Sorption of ethene and propene on amorphous nickel oxide–alumina/silica catalysts under oligomerization conditions 123
Nitric oxide reduction
Calcination conditions on copper/alumina catalysts for carbon monoxide oxidation and nitric oxide reduction 275
Nitric oxide reduction
Vanadium oxide monolayer catalysts: Preparation, characterization and catalytic activity – a review 1
Oxidation
Evaluation of magnesium aluminate spinel as a sulfur dioxide transfer catalyst 319
Oxidation
Vanadium oxide monolayer catalysts: Preparation, characterization and catalytic activity – a review 1
Passivation
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233
Platinum
Isomerization of n-hexane on platinum dealuminated mordenite catalysts: I. Influence of the silicon-to-aluminium ratio of the zeolite 283
platinum
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. II. Kinetic study 295
Platinum mordenite
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. III. Influence of hydrocarbon impurities 307
Platinum/alumina
Temperature-programmed reduction and desorption studies of praseodymium promoted platinum/alumina catalysts 167
Pore shape

Zirconia as a support for catalysts: Influence of additives on the thermal stability of the porous texture of monoclinic zirconia 363
Praseodymium
Temperature-programmed reduction and desorption studies of praseodymium promoted platinum/alumina catalysts 167
Praseodymium oxide
Oxidative coupling of methane over praseodymium oxide catalysts 103
Propene hydrogenation
Influence of the activation temperature on the activity of copper–zinc oxide catalysts in the hydrogenation of propene 333
Propene oligomerization
Sorption of ethene and propene on amorphous nickel oxide–alumina/silica catalysts under oligomerization conditions 123
Reaction mechanism
Dimerization of n-butenes on amorphous $NiO–Al_2O_3/SiO_2$ catalysts 69
Regeneration
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233
Rhodium chloride
Co-impregnation of rhodium chloride with hydrofluoric acid into dry and pre-wet alumina 205
Rhodium/alumina
DRIFTS study of adsorbed formate species in the carbon dioxide and hydrogen reaction over rhodium catalysts 219
Rhodium/alumina
Co-impregnation of rhodium chloride with hydrofluoric acid into dry and pre-wet alumina 205
Rubidium
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45
Semiconductors
Electrical conductivity and defect structure of lithium-doped magnesium oxide 89
Side-chain alkylation
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45
Silica/alumina
Catalytic cracking of hexadecane over ZSM-5 modified with $SiCl_4$, BCl_3, NH_4F and $LaCl_3$ 185
Silica/boric anhydride
Catalytic cracking of hexadecane over ZSM-5 modified with $SiCl_4$, BCl_3, NH_4F and $LaCl_3$ 185
Silicon/aluminium
Isomerization of n-hexane on platinum dealuminated mordenite catalysts: I. Influence of the silicon-to-aluminium ratio of the zeolite 283
Silicon/aluminium
Isomerization of n-hexane on platinum dealuminated mordenite catalysts. II. Kinetic study 295
Silver oxide
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45
Silver/alumina
Diffuse reflectance Fourier-transform IR studies on the role of catalyst support on selectivity in ethene oxidation 247
Spinel
Evaluation of magnesium aluminate spinel as a sulfur dioxide transfer catalyst 319
Strong metal-support interaction
Calcination conditions on copper/alumina catalysts for carbon monoxide oxidation and nitric oxide reduction 275
Structural sensitivity
Calcination conditions on copper/alumina catalysts for carbon monoxide oxidation and nitric oxide reduction 275
Sulphates
Evaluation of magnesium aluminate spinel as a sulfur dioxide transfer catalyst 319
Sulphur dioxide
Evaluation of magnesium aluminate spinel as a sulfur dioxide transfer catalyst 319
Surface properties
Surface properties of magnesium oxide obtained from magnesium hydroxide: Influence of preparation and calcination conditions of magnesium hydroxide 265
Synergetic effect
Influence of the activation temperature on the activity of copper–zinc oxide catalysts in the hydrogenation of propene 333
Thermal stability
Zirconia as a support for catalysts: Influence of additives on the thermal stability of the porous texture of monoclinic zirconia 363

Vanadium oxide
Vanadium oxide monolayer catalysts: Preparation, characterization and catalytic activity — a review 1
Water vapour
Kinetics of wet atmosphere reduction of fused iron catalyst for ammonia synthesis L1
Xylene alkylation
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45
Zeolites
Side-chain alkylation of p-xylene with methanol on alkali cation zeolites 45
Zeolites
Synthesis of zeolite ZSM-48 in the presence of 1,8-diaminooctane and hexamethonium bromide: Analysis and ^{13}C-NMR spectroscopy 79
Zeolites
Synthesis and characterization of iron-modified ZSM-5 55
Zeolites
Role of metal contaminants in the production of carbon dioxide during the regeneration of cracking catalysts 233
Zeolites
Catalytic conversion of methanol to light alkenes on SAPO molecular sieves 139
Zeolites
Production of light alkenes from methanol on ZSM-5 catalysts 153
Zeolites
Isomerization of n-hexane on platinum dealuminated mordenite catalysts: I. Influence of the silicon-to-aluminium ratio of the zeolite 283
Zeolites
Catalytic cracking of hexadecane over ZSM-5 modified with $SiCl_4$, BCl_3, NH_4F and $LaCl_3$ 185
Zirconia
Zirconia as a support for catalysts: Influence of additives on the thermal stability of the porous texture of monoclinic zirconia 363
ZSM-5
Catalytic cracking of hexadecane over ZSM-5 modified with $SiCl_4$, BCl_3, NH_4F and $LaCl_3$ 185
